

FLUSH FITTING PUSH PAD WITH EXTERNAL STAND-ALONE ELECTRO-MECHANICAL DIGITAL KEYPAD

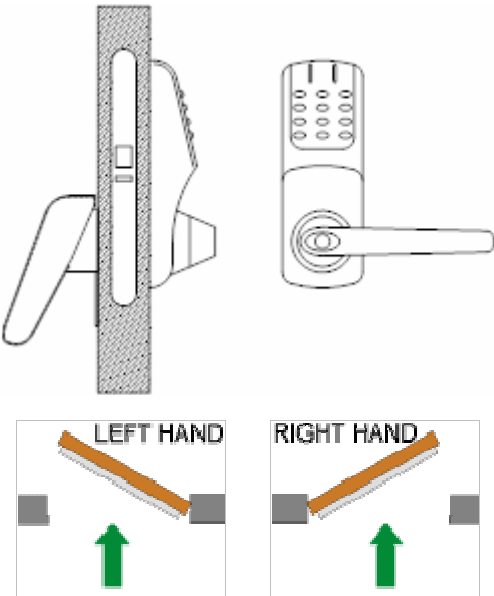

Drawing Not to Scale.

OPERATION

Pressing the pad, which has the instruction PUSH on the point of use, the exit device allows for fast, single action operation to open the door. Supplied with an 8761 x 70mm backset modular lockset which, combined with the flush fitting MICO 911 push pad offers easy operation whilst maintaining a high level of security. An external 'stand-alone' digital keypad with lever handle allows access once user has entered access code.

APPLICATIONS

Suitable for use in areas where occupants are likely to be familiar with the operation of the exit device. The light action for ease of escape makes the MICO push pad ideal for many applications, particularly for use by the elderly, disabled, reception areas for private offices, and small workshops. The external keypads allows controlled access of authorised personel without the use of keys.

HANDING

This unit is handed (LH or RH)
Suitable for use on single doors
