

SAFETY AND SECURITY WITH STYLE

MICO ELK 3

# HIGH SECURITY EXTERNAL LOCKING ATTACHMENT C/W CYLINDER PROTECTION

## OPERATION

A high security external locking attachment compatible with the MICO high security multi-point locking systems. It enables the door to be securely locked from the outside, while always providing an emergency exit from the inside. The lever handle on the external locking attachment is locked or unlocked using a key. The cylinder is installed within hardened steel housing which includes a hardened spinning disc, which gives access to the key. The cylinder protection disc and the hardened steel housing protect the cylinder from attack and forced entry.

## APPLICATIONS

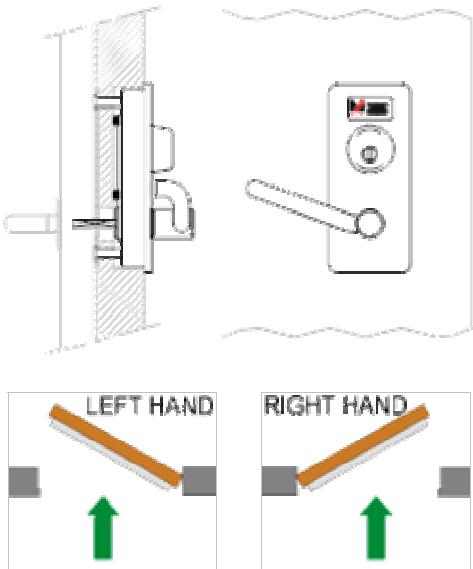

Suitable for use in areas where high security is of high importance. These include, clearing banks, high value retail outlets, commercial properties and sensitive secure areas. Suitable for use with Scandinavian Oval cylinders. For other cylinders please contact Tindall Engineering Ltd technical department.

## COMPATIBLE CYLINDERS

Scandinavian Oval from manufacturers such as Abloy, KABA, ASSA, Locken.

## DIMENSIONS

Suitable for door thicknesses 45mm and greater

## HANDING

This unit is handed (LH or RH)
