

SAFETY AND SECURITY WITH STYLE

MICO 942-3L DCNL

**SURFACE MOUNTED 3 POINT LOCKING SLAM LOCK (CELL LOCK)
WITH LEVER HANDLE**

OPERATION

High security multi-point lock allowing fast, easy slam locking of a cell or secure door. Operating the lever handle immediately retracts the multi-point locking shoots at the top, bottom and on the leading edge of the door. Light positive action by a lever handle on the non secure (ie corridor) side only.

The bolts are normally automatically deadlocked into position. To unlock, the key must be simultaneously turned and the handle operated. The bolts deadlock automatically and the lever handle becomes inoperative when the door closes again. The bolts are steel, non-tapered with a 23mm throw. Cylinder must be specified separately.

APPLICATIONS

Suitable for high security applications where a person must be locked inside a room quickly and effectively. Provides an extremely high level of security. Examples include secure units in hospitals, seclusion rooms, cells, magistrate's courts, detention centres and young offenders hostels.

DIMENSIONS

Standard height of 2150mm (can be reduced on site to suit)
 Extension kits also available, increasing the height to 3000mm
 Non standard height single piece units readily available to separate instructions.
 Mechanism zinc plated steel. External housings are aluminium.

HANDING & DIRECTION

This unit is handed and directional. When ordering please specify hand (LH or RH) and direction of opening (inwards or outwards, IN or OUT), as shown on the left.
